PROJECT

Face Following RobotFace Following Robot
May 2022 - Jun 2022

I have successfully developed a facial tracking robot designed to serve human well-being, a technology poised to provide significant assistance in the times ahead.

Contactless Doorbell By using ArduinoContactless Doorbell By using Arduino
Apr 2022 - May 2022

I successfully concluded a captivating project that has demonstrated its significant practicality in our everyday experiences, showcasing my ability to create solutions with real-world impact.

ACHIEVEMENT

Robotics Project Display Event, 2022

Secured 3rd position in the Robotics Project Display event organized by the Department of Global Education CUIET in collaboration with Deakin University. Led a team of three members in developing a "Face Recognition Robot" aimed at solving real-world problems faced by blind and handicapped individuals

EDUCATION

Chitkara University

Bachelor of Software Engineering
2021-2025

SKILLS SUMMARY

Java   76%

Java Script   56%
